Tablet **Mobile** NoteTaker

Pegasus' New Digital Pen/Mouse works with Microsoft Windows Vista™ and Microsoft Office® 2007

Product Description

The Tablet Mobile NoteTaker enables users to capture handwritten notes or drawings while you're away from the computer and conveniently save it into the unit's flash memory.

The Tablet Mobile NoteTaker works in two diverse modes: Mobile and Connected mode (on line). In Mobile mode, users can capture over 50 standard-size pages of handwritten notes or drawings and save them into the unit's built-in Flash memory. The unit is equipped with a USB cable, enabling files to be easily uploaded to a PC or Notebook, and saved and retrieved according to file name, date or other user-defined criteria. The easy-to-read LCD indicates operation status, including page number, capture mode, and battery level.

In connected mode, users can easily write and edits notes online. As well, users can switch between *Writing-on-Paper Mode*, using the product as a standard ink ball-pen, and *Pen-Tablet-Mode*, where the pen's hovering and mouse button functionality writes directly into Windows Vista™ and Office® applications.

Potential Users

Students, teachers, salesmen, technicians, presenters, executives, designers, and Windows Vista™ and Office® 2007 users.
